Att and the state of the state of the state of

Near & Leder Lung;

I read menully your for recently your penetrating king analysis of ey xanlanui cytoplasmic 'My, As usual among week human liked hert the parts when me and I liked best the parts which my own Tinking led me in similar directions. led me in imilar directions. I was spricially pleased staty an I was specially pleased that you, as probably bably throuly U.S. quelicist, are are the only US geneticist, are aware of the great theachierlings or hance of the great theoretical importance of my friend and former student Buchner's work on symbionts generally unknown also amange valagists. They you will be inter, Thus you will be interested Eld Louists Kathin new and to hear that his new and I think very good book is in press and will be published any day, Buchner worte ne cently on amazing fact hering He has a coccid (supposed to the is studying he is (supposed to be male heterogametic) an which hald of the eggs necein symplimes before leskiliade receive symbionts (before fertilization!) The former develop into and half not, The former develop this

females and the latter into males and the males
